

Performance Testing

Date	29/09/2026
Team ID	UNM1425LegalEase: AI-Powered Legal Document Generator
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman / API client (test plan)
Type of Testing	Load testing (planned)
Target Module / API	POST /generate (FastAPI)
Test Environment	Local development environment
Test Date	29/09/2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Generate one legal document	1	60	Document generated successfully through /generate
2	Generate repeated documents	5	60	Stable responses with no critical errors
3	Concurrent generation requests	10	60	Service remains responsive under planned load
4	Export generated document	5	60	TXT/DOCX/PDF export completes successfully

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not recorded	Not recorded	Not measured
2	Response Time (Max)	< 5 seconds	Not recorded	Not recorded	Not measured
3	Throughput (Req/sec)		Not recorded	Not recorded	Not measured
4	Error Rate	< 1%	Not recorded	Not recorded	Not measured
5	CPU Utilization	< 80%	Not recorded	Not recorded	Not measured
6	Memory Utilization	< 80%	Not recorded	Not recorded	Not measured

Step 4: Observations & Analysis

Key Findings: The supplied project document describes the FastAPI + Streamlit + Gemini workflow, but contains no recorded performance-test measurements.

Bottlenecks Identified: No measured bottleneck is documented in the supplied source.

Optimization Steps Taken: The source describes a modular architecture and document-formatting utilities; no measured optimization results are supplied.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

Performance-test screenshots were not included in the supplied project source. Attach Postman/JMeter/Locust/k6 evidence here if available.
