

Technology Stack

Date	29/09/2026
Team ID	UNM1425LegalEase: AI-Powered Legal Document Generator
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side <i>(e.g., React, Angular, HTML/CSS)</i>	Streamlit	Provides the user interface for legal-document inputs, generation, preview, editing and downloads.

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	Python + FastAPI	Handles API requests, validation, routing and the /generate endpoint.
3	Database / Data Storage <i>(e.g., MySQL, MongoDB, PostgreSQL)</i>	Not specified	The project does not define a database; it focuses on API generation and document export.
4	Cloud / Hosting / Deployment <i>(e.g., AWS, Azure, Heroku, Docker)</i>	Render / Railway / Deta / Streamlit Community Cloud / Fly.io / VPS	Deployment options listed in the project for future/local-to-cloud use.
5	Version Control & CI/CD	Not specified	No version-control or CI/CD tool is specified in the project document.

	<i>(e.g., GitHub, GitLab, Jenkins)</i>		
6	Third-Party APIs / Other Tools <i>(e.g., Stripe, Twilio, Google Maps)</i>	Google Gemini 1.5 Pro API	Generates structured legal documents from document type, parties, terms and effective date.
