Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[https://github.com/kanimozhibca2025-star/LegalEase]
Programming Language(s)	Python
Framework(s) Used	FastAPI, Streamlit

Key Features Implemented	AI-powered legal document generation, editable document preview, and document export in TXT, DOCX, and PDF formats.
Pending / Incomplete Features	None
Setup / Run Instructions	1. Install the required dependencies using <code>pip install -r requirements.txt</code>. 2. Configure the Gemini API key in the <code>.env</code> file. 3. Start the FastAPI backend using Uvicorn. 4. Run <code>app.py</code> to start the Streamlit frontend

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

LegalEase is implemented using Python with FastAPI and Streamlit. The application includes AI-powered legal document generation, document editing, and export options in TXT, DOCX, and PDF formats.
